

LIFE SAVING BRACELET

DATA SHEET

DESCRIPTION	AIDme is an innovative bracelet that allows you to enter the most relevant personal data such as the blood group, drug and food allergies, intolerances, medications taken, medical pathologies, Heart Rate Variability (Alfa1, SDNN, rMSSD, SI), Covid-19 test response the date, type, recall of the anti-Covid vaccine, contact of your own doctor, emergency numbers, consent to organ donation and any other health information. All data can be updated safely, simply and immediately.
HOW DOES IT WORK	<p>To activate it, bring your smartphone close to the AIDme label on the bracelet. A page will be displayed where, by selecting "Modify", you will be able to enter your medical data and emergency contacts. The application will ask you to enter a 6-digit code to protect your data and an email is needed only to restore the system to its initial settings.</p> <p>To view the information, bring your smartphone close to the AIDme label.</p>
COMPATIBLE DEVICES	<p>AIDme works with most of the latest generation smartphones. You can check the list of compatible models and how to activate the NFC reader.</p> <p>The information held on your bracelet is regulated by Privacy laws under (GDPR) UE 679/2016</p>
SECURE DATA	<p>The system has two databases, one for generic registration data and one pseudo-anonymized with health data. The one with identification data resides on ovh cloud server. The entire infrastructure is protected by the anti-ddos ovh system to which it is possible to add openstack security groups: comparable to a firewall, they are managed directly at the level of the openstack infrastructure, upstream of the instances. Health data resides on cloud server through the services offered by Chino. Chino is financed and followed by the European union's horizon 2020 program for research and innovation with agreement number 822995.</p> <p>For safety Chino provides a total compliance with EU / GDPR and US / HIPAA standards with ISO 9001 and 27001 certifications.</p>
STORAGE FACILITIES	<p>Personal data may be stored on server within the European Union (OVH Cloud). They could be transferred outside of the European Union always within the limits and under the conditions set out in articles 44 and ss. of EU Regulation 2016/679, in order to comply with purposes related to the transfer itself.</p>

Why choose AIDme?

The Lifesaver AIDme bracelet differs, making it better, when compared with others on the market, because it is the only one that simultaneously contains all the following features:

- Doesn't need for specific APPs
- No subscription fees
- It's possible to print both external and internal brand (at your choice)
- No battery or power supply
- Free software updates with any new features.
- Data protected and safe with international and not only European regulations.
- Available in 10 languages.
- Data available worldwide regardless of which system reads it.
- No data are used for advertising or user profiling.
